Combination	**Total Cost**	**Total Cost per subscription pack combo: (270 customers)**	**features:**					rows a-l are months			**expected Customers:**
6 × C1	$3.42	$923.40	6					colomns are each month by year			270
1 × C1 + 1 × C2	$3.83	$1,034.10	2					basically (colomn, row) box notation for the APL users			270
2 × C1 + 1 × C2	$4.40	$1,188.00	3								270
3 × C1 + 1 × C2	$4.97	$1,341.90	4								270
4 × C1 + 1 × C2	$5.54	$1,495.80	5								270
5 × C1 + 1 × C2	$6.11	$1,649.70	6								270
1 × C1 + 1 × C3	$6.52	$1,760.40	2								270
2 × C1 + 1 × C3	$7.09	$1,914.30	3								270
2 × C1 + 2 × C2	$7.66	$2,068.20	4								270
3 × C1 + 1 × C3	$7.66	$2,068.20	4								270
4 × C1 + 1 × C3	$8.23	$2,222.10	5								270
5 × C1 + 1 × C3	$8.80	$2,376.00	6								270
3 × C1 + 1 × C4	$10.35	$2,794.50	4								270
4 × C1 + 1 × C4	$10.92	$2,948.40	5					**tax:**			270
5 × C1 + 1 × C4	$11.49	$3,102.30	6					8.25%			270
1 × C1 + 2 × C3	$12.47	$3,366.90	3					**tax applicable?**			270
4 × C2	$13.04	$3,520.80	4					0, factored into price			270
3 × C1 + 1 × C5	$13.04	$3,520.80	4								270
5 × C1 + 1 × C5	$14.18	$3,828.60	6								270
5 × C1 + 1 × C6	$16.91	$4,565.70	6								270
1 ×C3 + 1×C5 + 1×C1	$17.85	$4,819.50	3								270
2 ×C1 + 1×C7	$17.85	$4,819.50	3								270
5 × C1 + 1 × C7	$19.56	$5,281.20	6								270
1 × C1 + 1 × C8	$19.99	$5,397.30	2								270
				stripe integrations?:							
	y(n) = Total cost for n features										
	3.42 = Base price (for the minimal service or initial feature)					$0.57					
	di = Complexity of the ith feature					$3.26					
	n = Total number of features					$5.95					
						$8.64					
						$11.33					
						$14.06					
						$16.71					
numerit1 × Complexity x1 & numerit2 × Complexity x2} layers						$19.42					

platform parts:

pybrain3
numpy1.26.1
scipy
brian2/custom spike lib
rdkit/rdkit.js
biopython
flask
pyodide.js
brython.js

Supported OSes:

Does it run python?

Yes? then it likely is supported on even that OS unless not installed

google tv
android
apple & IOS (a-shell & i shell plus python install; seek manual and claude.ai for assistance with google search of it)
google-watch? <-- If ya get things installed via adb and a good microsd, probably will for andorid 4+
ubuntu/debian? <-- yes
termux.apk? <-- Test manually but yes.
userland.apk? <-- Test manually but yes.
Docker? Yes, tools prepackaged

##

Since it can be run anywhere including on a cellphone,
I figured I would make it possible for a person to download multiple versions of the one they train from their own data.
This would make even the free version accessible to them much like a paid subscription plan.
Since I will be training it offline via MRI & FASTA data relavent to the human head,
this is meant to be trained to be minimally fit and will be up after the 1st of January.

After that, I will open a shop for the second stage of stage 10 to AI development with tutorials.
To the rest with uncertainties, submission in writing of your concerns and question lingering will be welcomed.
Even the hackers of the world are welcomed to join me on this development and new set of findings.

Thank you.
Doing this work is an honour. To many of you on whom knew me when I was growing up,
Thank you.
You made the challenge worth it.
To those I went to church with and on the behalf of,
Also thank you.

To those of whom asked the same questions Alan Turing did, thank you.
You are on the right path, unlike those doing vector processing.

complexity:	Price:	notes:
1	$0.57	Each complexity class costs.
2	$3.26	Every step harder it is to solve that part, it is that much more costly for the user
3	$5.95	That is due to the complex nature of the features involved and the complexity associated with running that part as well.
4	$8.64	Take note that it is defined by monthly billing and not one time payments.
5	$11.33	
6	$14.06	
7	$16.71	
8	$19.42	

										$3.83			**notes:**
										-$3.83			test in deployment mode
										-$0.41			refund
													fee for refund to self
