DEMOCRATS

BREAKING: Democrats flip FOUR down-ballot seats in Florida and Pennsylvania special elections

Dylan, this is *HUGE*.

Last night, Democrats flipped four seats on a school board, city council, and state legislature in districts that have been dominated by Republicans for *years*.

This didn't happen by accident — voters are sending a message *loud and clear*.

Democrats have been on a winning streak since Trump took office, flipping 31 legislative seats while Republicans have flipped *none*. All the while, Donald Trump's approval rating has slumped down to just 33%.

Dylan, Americans everywhere are sick and tired of Republicans leaving nothing but chaos and destruction in their wake. Democrats at all levels of government have massive momentum because they've shown up to *fight and win* for the American people.

The DNC has made it our mission to build a campaign infrastructure that works from the ground up, to help Democrats win races from school boards to the US Senate. **And it's paying off big time.**

We have just 76 days until Election Day, and we're going to need to make a *huge* push in the final weeks ahead if we want to keep this momentum going. **So we're going to need you with us.**

99.7% of the donations we receive are from grassroots supporters like you doing what they can to make real change possible for their families, friends, and neighbors this year.

Dylan, we're asking you to join them today with a $7 contribution to the DNC. Your support will go directly towards investing and organizing across the country to elect Democrats at every level of government this year.

If you've stored your info with ActBlue, we'll process your contribution instantly.
